ABOUT ME

Result-driven Full-Stack Systems Architect with 5+ years of experience in bridging the gap between high-level technical engineering and client-facing strategic communication. Proven track record in leading development for international-scale healthcare and fintech platforms, managing cross-functional teams, and translating complex technical architectures into actionable insights for non-technical stakeholders. Expert in React, Next.js, and Node.js, with a strong focus on delivering user-centric, global solutions and managing technical roadmaps for diverse international partners.

WORK EXPERIENCE

Zentrix Equity & Valuation Platform

Senior level | Systems Architect

Ibadan , Ibadan

2026-02-01 | Currently working here

As Systems Architect at Zentrix Equity & Valuation, I lead the design and implementation of scalable high-level technical architectures for fintech platforms. My daily activities include managing cross-functional development teams and translating complex technical insights for non-technical stakeholders. I successfully optimized platform performance and delivered robust, user-centric global solutions using React, Next.js, and Node.js.

Unlimited Healthcare (UHC)

Senior level | Lead Developer

Owerri , Owerri

2026-02-01 | 2026-05-01

Leading end-to-end development of a high-scale healthcare platform, serving as the primary technical point of contact for project scope and delivery updates. Translating complex AI-driven health diagnostic requirements into clear development sprints and client-facing progress reports. Managing production configurations and Google Play Store certification cycles in synchronization with client release timelines.

CareMandate

Senior level | Lead Developer

Ibadan , Ibadan

2026-02-01 | Currently working here

Orchestrated the development of an enterprise clinical management system using a specialized Monorepo architecture. Synchronized web (React) and native mobile (Expo) applications to maintain 100% data consistency. Developed high-performance administrative dashboards and mobile companion apps sharing a unified business logic layer. Implemented robust security protocols for handling enterprise-grade patient and staff management data.

Handyman NG

Senior level | Frontend Developer

Owerri , Owerri

2025-06-01 | 2025-08-01

As a Senior Frontend Developer at Handyman NG, I spearheaded the redesign of the company's digital service platform. My primary focus was building a highly responsive and intuitive user interface using React and Tailwind CSS to streamline service requests in the construction sector. I collaborated with the design team to implement pixel-perfect UI/UX improvements and integrated complex APIs for dynamic data fetching. These enhancements significantly improved mobile accessibility and performance, resulting in higher user satisfaction and streamlined customer interactions during my contract tenure.

Atom Group

Senior level | Web Developer

Owerri , Owerri

2025-04-01 | 2025-06-01

As a Senior Web Developer at Atom Group, I led the technical development of high-performance web applications tailored for the energy sector. My responsibilities included architecting frontend solutions with React and Next.js, optimizing backend workflows, and ensuring robust security protocols. I successfully delivered a suite of data visualization tools that streamlined utility monitoring and provided real-time insights, resulting in a measurable increase in operational efficiency and reporting accuracy during my contract tenure.

Selfany

Mid level | Frontend Developer

Owerri , Owerri

2024-03-01 | 2024-04-01

As a Frontend Developer at Selfany, I spearheaded the development of interactive and responsive web applications using React and Tailwind CSS. My role involved collaborating with backend engineers to integrate APIs and ensuring pixel-perfect UI implementation from Figma designs. I successfully improved application load times by implementing efficient code-splitting and optimizing front-end assets for better performance.

iLearnova

Mid level | Full Stack Developer

Lagos , Lagos

2023-06-01 | 2024-01-01

Built and maintained an e-learning platform that contains 500+ students and tutors. Designed RESTful APIs and integrated backend services using Node.js and MySQL. Led a 4-person development team, managed sprint planning, and optimized frontend for 40% faster load times. Improved user retention by enhancing the course enrollment and progress tracking flow.

Dimatech IT Consultancy

Entry level | Full-Stack Developer
Lagos , Lagos
2021-01-01 | 2023-04-01

As a Full-Stack Developer intern at Dimatech IT Consultancy, I participated in the development of robust web solutions using technologies like PHP, Laravel, and React. My responsibilities included building responsive frontend components, designing database schemas in MySQL, and assisting in backend API integration. I actively engaged in code reviews and troubleshooting sessions to maintain high software standards and successfully contributed to the timely delivery of multiple projects.

EDUCATION

Federal University of Technology, Owerri (FUTO)

Degree | Bachelor of Technology in Software Engineering

I am currently pursuing a Bachelor’s degree at the Federal University of Technology, with a specialized focus on software development and systems engineering. My academic journey involves deep-diving into complex technical subjects like data structures, algorithms, and high-level architectural design. I have consistently demonstrated a commitment to academic excellence while simultaneously applying my theoretical knowledge to practical, real-world projects. I actively engage in technical workshops and collaborative research to stay at the forefront of emerging technologies, ensuring that I am well-prepared to solve complex engineering challenges upon graduation.

JOB SKILLS

- React.jsReact NativeNext.js
- AngularTailwind CSSJavaScript
- HTMLCSSCapacitor
- ExpoTurboRepo (Monorepo)WebSockets
- Node.jsExpressLaravel
- PHPPythonNest.js

MySQL

MongoDB

Firebase

AWS

Docker

Team Collaboration & Stakeholder Leadership

Technical Translation
(Dev-to-Client)
